PRELIMINARY AMENDMENT

Sir:

Please amend the specification (Sequence Listing at pages 25-29) by substituting the enclosed corrected Sequence Listing pages 25-29. The amendments were made to comply with the hand-marked corrections contained in the Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures mailed 13 September 2000. No new matter has been added. Entry of the Amendment is respectfully requested.

REMARKS

The amino acid valine was inadvertently inserted (*i.e.*, a typographical error) at position 341 of SEQ ID NO:2 in applicant's previous Preliminary Amendments, filed 07 October 1999 and 03 January 2000, made in response to correct defects in the originally-filed sequence listing. Applicants now delete this valine residue, resulting in a 419 amino acid sequence for SEQ ID NO:2 as it was listed in applicant's original Sequence Listing. Support for this amendment is found in our originally-filed Sequence Listing, and throughout the specification and claims, which refer to an amino acid sequence (for SEQ ID NO:2) of up to about 419 amino acids.
